

Job Role: Backend Developer

Time: 12 Hours

Question Paper Code (Optional): Your Debit Card Pin

Instructions:

1. Take this assignment as you are already onboarded with us, you won't be paid for this work though.
2. Submit the project before the deadline. If not, give us a valid excuse.

List of valid excuses-

- Stomach ache
 - Headache
 - Abba Nahi Maan Rahe
 - Forgot Note-Book at Home
 - Grandparents are not keeping well.
 - And others
3. Extra sheets will not be provided. (We will probably be crushing our stuff in it)
 4. If caught cheating, we will still give you an offer letter without mentioning salary.

Question-1

Option 1 -

Create a login page with a backend database that provides the following features

1. User Sign Up
2. User Sign in
3. Forgot Password/Password Reset option
4. If the user typed password is incorrect then tell the user if the password or login ID is wrong.

Option 2 -

Create a blog post type CMS which has the following features -

1. Admin login to upload and edit blogs
2. CMS page where blogs can be uploaded/edited
3. Image add option to the blog
4. Comments section for the blog if possible.

Please note that all these codes have to be written and done from scratch. You can send a temporary hosted link to us to show what you've done and upon request, screen share the code with us.

You will be tested on your ability to write clean code and finishing the task with a minimum number of errors. Communication and code knowledge will also be tested accordingly.
